

a plurality of electron-emitting devices disposed on the substrate,
each electron-emitting device comprising:
a carbon film composed chiefly of carbon, and
an electrode electrically connected to the carbon film,
wherein the carbon film contains therein one or more kinds of
elements selected from the group consisting of lithium, potassium, sodium, calcium,
strontium, and barium of within the range of 1 mol% to 5 mol% in terms of the percentage
to carbon; and
wirings connected to the plurality of electron-emitting devices.--

REMARKS

Claims 1-14 are now presented for examination. Claims 9-14 have been
added to provide Applicants with a more complete scope of protection.

Claims 1-8 were allowed in the Notice Of Allowance dated November 28,
2001. Added Claims 9, 11, and 13 recite features relating to a carbon film, that are similar
in at least some respects to those of Claims 6, 7/6, and 8/7/6, respectively, and added
Claims 10, 12, and 14 also recite features relating to a carbon film, that are similar in at least
some respects to those of Claims 2, 3/2, and 4/3/2, respectively, and also are believed to be
in condition for allowance. Accordingly, favorable consideration and early passage to issue
of the present application are respectfully requested.

Applicants' attorney of record may be reached in our New York office by telephone at (212) 218-2100. All correspondence should continue to be directed to our below listed address.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "Frank J. Scinto", written over a horizontal line.
